

PECB Certified ISO 22301 Lead Implementer eLearning Training Course

Master the implementation
and management of business
continuity management system
(BCMS) based on ISO 22301

Technological developments have taken the world by storm, changing many aspects of our lives, including the way we teach. The COVID-19 pandemic has taught us that adapting to the new virtual environment is no longer optional. For many of us, it is a necessity.

PECB eLearning started as an attempt to adapt to the ever-changing nature of online education. PECB has created this platform to facilitate the delivery of training courses and make our products accessible from different environments, including the comfort of one's own.

The ISO 22301 Lead Implementer eLearning training course is designed to enable attendants to implement a business continuity management system (BCMS) based on the requirements of ISO 22301 and establish a framework that allows organizations to continue operating efficiently during disruptive events.

The trainers that deliver the ISO 22301 Lead Implementer eLearning training course:

Meet the Trainers

Our eLearning training courses are designed to meet each individual's needs and become accessible beyond location and time restrictions. Each eLearning training course is delivered by several experienced trainers from all around the world.

The course is divided in video sections and subsections. Videos contain animations to support what the trainer is lecturing. The animations correspond to the sections provided in Microsoft PowerPoint in the traditional mode of training. To keep our candidates engaged, we have incorporated quizzes into our eLearning training courses.

Ms. Carolina Cabezas
Compliance Director at PECB

Ms. Rinske Geerlings
Business Continuity
and Risk Management expert

Mr. Orlando Olumide Odejide
Business Continuity expert

Dr. Michael Redmond
Expert in Information Security
and Business Continuity

How does the ISO 22301 Lead Implementer eLearning experience look like?

Our ISO 22301 Lead Implementer eLearning training course is delivered on the KATE app. It becomes available after you log in using your PECB account.

In addition to having the training course content in the video format, you can also access the regular training course materials format, structured in training course days, with the additional files available in an editable format (depending on the training course, the case study, exercises, and exercises correction key files will also be available).

Quizzes are part of the training course to interactivity between attendants and the training material.

- ✓ Take the training course
- ✓ Access the materials on KATE
- ✓ Enter the exam at your most convenient date, time, and location via PECB Exams

How can you benefit from the PECB eLearning experience?

Our eLearning training courses have been designed to meet the needs of diverse learners who have different learning preferences and/or limited time to attend a training course session.

Here are some of the main benefits of the PECB eLearning experience:

- ✓ The fact that the entire training course and examination is carried out electronically (hence the “e” in eLearning) means that all you need in order to access these training courses is a device (e.g., computer, tablet, smartphone), working internet access to connect the device to, and the KATE application.
- ✓ Having access to the training courses 24/7 enables you to dictate the pace of your study. You do not have to worry about schedules, traveling, and accommodation, or having to take days off from work.
- ✓ The unlimited access allows you to go back to any section of the training course as you need them.
- ✓ Every training course consists of several video sections. This was done with the sole purpose of making the information easy to receive and process; think of the podcasts that we listen to while commuting, for instance.

Simply put, the eLearning training courses are a convenient way to effectively enhance your professional skills. Your virtual classroom now is KATE!

Why should you attend?

No two disasters in the world cause equal damage. Between the unpredictability of natural disasters, information security breaches, and incidents of different nature, preparing for such events makes the difference between sustainable organizations and organizations that only work ad-hoc. Mitigating risks, avoiding consequences, and coping with the negative effects of disasters and incidents, while continuing operations requires detailed planning and preparation.

Organizations can improve their understanding and management of disasters, incidents, and risks by having a business continuity management system (BCMS) based on ISO 22301. PECB has designed this training course to help participants to conduct this task as efficiently and effectively as possible.

After attending the eLearning training course, you can take the exam. If you successfully pass it, you can apply for a "PECB Certified ISO 22301 Lead Implementer" credential, which demonstrates your ability and practical knowledge to implement a BCMS based on the requirements of ISO 22301.

Who should attend?

- ✓ Project managers and consultants involved in business continuity
- ✓ Individuals responsible for ensuring conformity to business continuity requirements within an organization
- ✓ Members of a BCMS implementation team

Training course structure

Introduction to ISO 22301 and initiation of a BCMS
